

KIDney Notes

The ASPN Newsletter

FROM THE PRESIDENT

Jodi Smith, MD, MPH, President

Dear Colleagues,

It was wonderful to see so many of you at ASPN in Orlando. The highlight for me was to see the amazing **Julie Ingelfinger** win the Barbara T. Murphy Trailblazer Award. Julie, thank you for your outstanding contributions to the kidney community!

It was a busy but very productive #Kidneywk for the ASPN Council as we worked on our strategic plan – ASPNv5.0. We heard from almost 40% of our membership through interviews and survey respondents and we have met with 218 individuals on our **#ASPNTour** in the past few months. Sincere thanks to all of you who shared your feedback and vision for our society. Based on these data, we put together 5 goals with strategies for each of these goals. Next steps of the strategic plan development are to share both the survey data and the draft of our proposed goals and strategies with all of you for your feedback. Special thanks to **Darcy Weidemann** representing the workforce committee and **Bruder Stapleton** representing the ASPN Foundation, who joined us for this important work. Our timeline is to roll out the new ASPN Strategic Plan at PAS. We can't wait to get to work - our future is bright!

One of the most striking things about ASPN is the number of you who generously give your time and talent to advance the Society's mission. The success of ASPN is so clearly a result of the high level of engagement of our members. We are excited to announce three new initiatives that are based on that foundation.

First, we are launching **three new awards** to recognize all you do in service to ASPN.

- **ASPN Outstanding Service Award** - Recognizes an individual who has made significant contributions to the ASPN community.

Follow Us

- **ASPEN Equity, Social Justice and Advocacy Award** - Recognizes an individual whose work advances equity, social justice, and advocacy in the field of pediatric nephrology.
- **ASPEN Mid Career Award** - Recognizes an individual who has made significant contributions to the field of pediatric nephrology through their clinical service, research, or education of trainees and or/ junior faculty.

The call for nominations will be coming later this month with awards being announced at the PAS/ ASPN Annual Meeting in April in Washington, DC. Please nominate an amazing pediatric nephrologist near you☺.

The second initiative is the **ASPEN Mentorship Program**. As I reflect on my own journey from fellowship to now, any bit of success and certainly all of the fun I have had has been a result of incredible mentorship. This mentorship has been in multiple areas – research, leadership, transplant medical direction, how to be a young working mom of 3 young kids, and now how to be an old working mom of 3 old kids. I found my mentors in Seattle but also across the country. The new ASPEN Mentorship Program is aimed at helping our

members make these connections for any aspect of mentorship that they identify as a need. Please sign up to be a mentor or mentee or both☺.

The third initiative that is being launched is the **JEDI Speaker Bureau**. Thanks to **Nicole Hayde**, **Keia Sanderson**, and **Shina Menon** for leading this effort. The goal of this program is to increase the visibility and opportunity for women and/or those who are traditionally underrepresented in medicine to be invited speakers at division meetings, grand rounds, and national/international conferences. Be on the lookout for the sign up that will be sent out later this month.

We will be having a **ASPEN Town Hall** on December 9th at 3:30 EST to update you on these initiatives as well as more Society business. We have added this December zoom call in response to what we have heard on the **#ASPENTour** – we need to increase the ways that we communicate the ASPEN activities with you.

Lastly, thank you all for all you do for our society. Please don't hesitate to reach out to me at jodi.smith@seattlechildrens.org with any questions or concerns.

Certification Committee

Our American Board of Pediatrics and ASPN collaboration for MOC Part 4 credit is live! The activity can be found by searching the ABP online catalog of activities (under Part 4) when one logs into his/her/their ABP portfolio.

Pediatric Nephrologist Transition of Pediatric Care: A Quality Improvement Project Template (QIPT)

Sponsor :
The American Board of Pediatrics

Description :
This Quality Improvement Project Template (QIPT) is based on quality improvement methods used by pediatric nephrology practices that measurably improved documentation of successful adolescent and young adult transition to adult-centered care. The template was inspired by the needs of Pediatric Nephrologists, but can be used in any clinical setting. The template directs users in the collection of data and the selection and implementation of improvement strategies to guide improvement. The template guides you in producing run charts reflecting clinical data measurement results, comparative data for group practices, and benchmarked data and targets for each measure, which can be adapted to your setting and local context.
While this activity is designed for pediatric nephrologists, it can be modified for use by other pediatric subspecialists that care for complex pediatric patients that require transition to adult health care.

Completion Criteria :
Allow 2-3 months to complete this QIPT. Completion of A Roadmap for Supporting Emotional Health for Children with Chronic Conditions and their Families: A Quality Improvement Project Template (QIPT) requires entering three cycles of patient data over time (Pre/Post/Sustain or Baseline/Intervention #1/Intervention #2). Each cycle must include 10 unique encounters for a total of 30 for the project. The patients required for all three cycles can be different. We encourage attending physicians to partner with their fellows who can also receive MOC credit for this project. Typically, a QIPT can only be completed once for MOC credit. However, if you would like to continue your work through several more iterative cycles of change to achieve your project goal, we would accept another application with a clear understanding of the continued improvements you intend to make. Your exact MOC cycle dates may be reviewed within your online ABP Portfolio account by clicking the link for My MOC Dashboard.

IG: [aspneph](#)

Facebook: [aspneph](#)

Would you like to be a part of ASPN communications or #SoMe team? Please reach out to [@drM_sudha](#) or send an email to info@aspneph.org.

Submitted on behalf of ASPN Communications Committee by S. Sudha Mannemuddhu, MD

The objective is to provide a free and easily accessible MOC Part 4 opportunity which corresponds with the quality improvement work that we are already doing in daily practice for our pediatric nephrology patients.

Interested ASPN members will be able to use or import a transition checklist provided by the Certification Committee through the ABP platform OR continue to use the transition checklist/process that your practice has established for your patients. There will be a process to report data on transition readiness documentation for 10 patients on 3 occasions and self-reflection comments of this QI process. ASPN members should be able to submit this work for 25 MOC Part IV credit points.

If this project is successful, in the future we can develop additional ASPN-ABP sponsored MOC

Transplantation Update

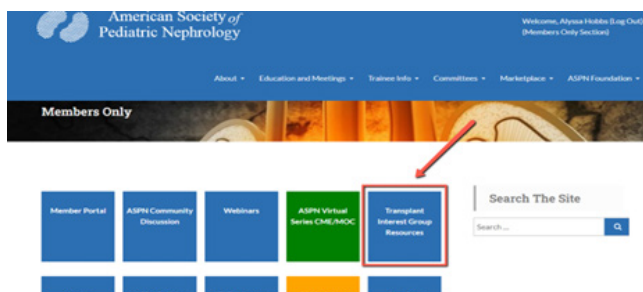

OPTN/UNOS NEWS:

In coming chair of the OPTN Pediatric Committee is Rachel Engen rengen@wisc.edu. Additionally we have Aaron Wightman aaron.wightman@seattlechildrens.org on the Ethics Committee, Sandi Amaral AmaralS@chop.edu as Chair of the VCA Committee and on the Policy Oversight Committee, Jodi Smith as the Pediatric SRTR representative and Nicole Hayde nicole.hayde@einsteinmed.edu is on the MPSC (Membership and Professional Standards Committee) and the BOD as incoming Region 9 Councilor.

OPTN/UNOS Fall 2022 Public Comment ended September 28th. Comments relating to the Kidney and Pancreas Committee proposal for conversion from the current allocation policy to a “Continuous Distribution” policy will be reviewed at BOD meeting in December. Modeling is underway to see effect of the proposal on all patient cohorts but of course we are particularly interested in how children and their access to deceased donor kidneys will be impacted. Rachel Engen is currently (in her role as incoming chair of the UNOS Pediatric Committee) reviewing the modeling results of the continuous distribution proposal and specifically its effect on children. More to follow.

ASPN TIG (Transplant Interest Group) NEWS:

The TIG has 3 goals; Education, Advocacy and Mentorship. Transplant related educational resource documents have been posted on the ASPN website. Please let us know if you have other resources you would like added to the site!

We are seeking to gather and post additional non-print educational resources to share with the ASPN membership such as webinars/YouTube lectures/etc. If anyone has such a resource they would like to share please do!

We are currently working on a few new projects. We are hoping to publish in the Journal of Academic Medicine our needs assessment relating to peds nephrology fellowship training and experience. Our new survey for pediatric kidney transplant program directors is meant to enlighten us and our institutions as to what is needed in the way of support for this position (similar to what is expected in the way of institutional support for the Dialysis Medical Director). Additionally, we submitted transplant related proposals from our group to ATC and are planning to submit proposals to the planning committee for PAS/ASPN.

Lastly the TIG is planning a webinar relating to relating to the Transplant Medical Director role (requirements, tips, tricks, etc) - similar to what was done a year or two ago by ASPN for the Dialysis Medical Director role. Stay tuned for more details and projected completion date!

American Society of Transplantation News:

Would you like to join the AST Pediatric Community of Practice? The current chair of that group is Katherine Twombly Twombly@mus.edu

Don't forget! AST has a wonderful Pediatric Transition Portal with transition readiness tools! <https://www.myast.org/education/specialty-resources/peds-transition>

INTERNATIONAL PEDIATRIC TRANSPLANTATION ASSOCIATION NEW: Save the date: the IPTA 2023 Congress will be held in Austin, March 25 thru 28th, 2023. <https://ipta2022.org/> Abstract submission is now open with abstract deadline September 6th.

If you are interested in joining the TIG, please reach out to smbartosh@wisc.edu and we will add you to the membership!

Respectfully submitted, Sharon Bartosh

Workforce Committee

Coming soon: ASPN is partnering with the AAP to perform a workforce survey. The survey was last performed almost 10 years ago, and this will enable us to track important trends in our pediatric nephrology workforce. Anticipate seeing the survey request in the coming month, and please take the time (~10 minutes) to complete it. Survey participants will have a chance to win a \$50 gift card!

Call for Mentors for the ASPN Mentorship Program

You may have heard that the ASPN is launching a longitudinal mentorship program. Please consider participating as a mentor – you undoubtedly have valuable experiences and expertise that could benefit a junior colleague! **If you are interested, please sign up before December 2nd at: <https://aspneph.app.neoncrm.com/np/clients/aspneph/event.jsp?event=4&>**

ASPN Fellow Speed Mentoring Event at ASN

Thank you to all who attended!!

Foundation Update

As 2022 nears an end, please consider contributing the ASPN Foundation. Thanks to your generosity, the Foundation is able to support a growing number of ASPN activities. In the past year, the ASPN Foundation supported trainee travel to the IPNA congress, ASPN annual meeting and the Miami Jose Strauss meeting, as well as funding for the Leadership Development Program, the Affiliate program, the John E. Lewy Advocacy scholars and most recently for ASPN members selected to the New Century Scholars program. The Foundation also committed \$10,000 in Foundation resources as a match for the H. William Schnaper lecture that was successfully matched by society members. We also received our first behest this year to support the Adrian Spitzer Distinguished Lecture. Many of you have benefited directly or indirectly through your division by these programs.

Growth of the Foundation will allow additional support for new priorities established by the new strategic plan that will be completed by ASPN Council in Orlando. Please consider the ASPN Foundation in your philanthropy plans—and, also with your holiday shopping on Amazon Smiles. In addition, a great way to honor a colleague and support trainee travel is through a named travel award.

Donations to support each of the ASPN programs can be made through aspneph.org.

Thank you for your generosity.

The ASPN Foundation Board of Directors

JELF Scholars Update

This September in Indianapolis, we had our first in-person JELF scholars' meeting since the start of the COVID pandemic. Everyone was excited to see familiar faces and share ways to improve our advocacy efforts. As a pediatric nephrologist in training, the baby of the JELF family, I was nervous; but grateful to be surrounded by past and present

scholars, all dedicated to improving the lives of children with kidney disease.

We learned that when Dr. Ray Bignall decided to join the field of nephrology, he was motivated by the freedom in our field to address social determinants of health. He mentioned, "I didn't become a Peds nephrologist because I love the ENaC channel; I did it because I love social determinants of health." He has made himself available to help others, and as a result, he has met other allies and forged a path to the White House, where he has been a fearless advocate for health equity. He encouraged us to elevate our voices for those who cannot.

We met Dr. Tracey Wilkinson, a relentless advocate for women's access to reproductive health. At the start of her career, she wanted to understand a simple question about the availability and access to over-the-counter emergency contraception for adolescents. Her research was cited in the federal court case that ultimately removed age restrictions for emergency contraception nationally. She showed us that change can start with a simple question and that research can be a powerful tool to advance our advocacy goals.

We also had the unique opportunity to listen to Dr. Eileen Brewer as she reflected on her journey in advocacy. From her first experiences testifying before congress to her most recent challenges advocating for our patients in a divided government and country, her story is one of persistence to improve access to care for children with kidney disease. She motivated us to take every opportunity to help our patients and be steady with our efforts.

We left the meeting with renewed energy to advocate for our patients. We channeled our energy during Kidney Community Advocacy Day a couple of weeks later. We joined other #KidneyAdvocates (members from the ASN and advocates from 21 patient and professional kidney health organizations) across the country to ask congress to increase protection for kidney transplant living donors. I was proud of the large turnout by pediatric nephrologists and

the response from our policymakers. We shared feedback about our experience during our monthly ASPN Public Policy Committee meeting, and it was exciting to hear about the existing support for the Living Donor Protection Act. We have a long road ahead, but we have an unbridled optimism that we will make this legislation a reality.

I am thankful for the opportunity to join the JELF Advocacy Scholars program. I am excited to continue to learn from my JELF family and other kidney advocates. We are meeting again next month to discuss the results of the November election and how it may impact our advocacy for our patients. One thing that stayed with me after our meeting in Indianapolis is that any small step counts. And if you ever wondered if you are doing enough, the important thing is that you are doing something. As a kidney patient myself, your advocacy means the world to us.

Advocacy on the side

Supporting Kidney Team during the 2022 Chicago Marathon with my family. The team raised \$53,266 for the National Kidney Foundation of Illinois. My brother ran to support our patients with kidney disease. He finished his first Marathon and earned bragging rights for raising the most money for Kidney Team.

Submitted by Dr. Carlos Becerril-Romero

ASPN WEBINARS

ASPN Webinar

Radiology Webinar

Date: Monday, December 5, 3-4pm ET

Subject: Graft Tenderness

The ASPN webinars are thriving in the zoom meetings with an average of 50+ participants per session and will continue to be offered every first Monday of the month at 3pm ET.

GREAT CARE FOR LITTLE KIDNEYS. EVERYWHERE.

Optimal care for all children with kidney disease.

Share our vision.

You are an important part of our global pediatric community.

Renew your IPNA membership.

ASPEN MEMBER OF THE MONTH

The Communications Committee is pleased to continue its Member of the Month series, where we highlight one ASPN member each month and recognize the amazing work that they are doing to support ASPN and the larger nephrology community. We hope you enjoy getting to know your fellow members a little better!

Dr. Tori Besser (November 2022)

Dr. Besser is a third year pediatric nephrology fellow at Cincinnati Children's Hospital Medical Center. She received her medical degree from the University of Cincinnati College of Medicine and completed pediatric residency at Cincinnati

Children's Hospital Medical Center. Her clinical and research interests are in chronic kidney disease and chronic dialysis. Dr. Besser's fellowship research has been focused on food insecurity, and she has implemented a process to screen for food insecurity in the dialysis unit and transplant and general nephrology clinics at Cincinnati Children's.

She is a native of Columbus, Ohio. She enjoys long-distance running (currently training for her first full marathon!), hiking, and spending time with her husband and dog whose name is fittingly Beans.

Dr. Besser can be found on [Twitter](#) and [Instagram](#) @tori_besser.

Dr. Chia Wei Teoh (December 2022)

Dr. Teoh is an Assistant Professor of Paediatrics at the University of Toronto in Ontario, Canada, where he also serves as the Medical Director of the Kidney Transplant Program at The Hospital for Sick Children. He received his medical degree from The Royal College of Surgeons in Dublin, Ireland and completed pediatric residency in Ireland. He began pediatric nephrology training at the Children's University Hospital (Temple Street) in Dublin, then moved to British Columbia two years later to complete a year of fellowship at BC Children's Hospital in Vancouver. He went on to complete three years of pediatric nephrology and kidney transplant fellowship at The Hospital

for Sick Children, where he is now faculty. In the last year, he was awarded the Junior Faculty Award for Clinical Excellence by the Department of Paediatrics at The Hospital for Sick Children and elected chair of the Canadian Society of Transplantation Pediatric Group.

Dr. Teoh's clinical interests include pediatric kidney and other solid organ transplantation, glomerular disorders, and complement-mediated diseases. His research focus aligns with his clinical interests, with an aim to gain a better understanding of the disorders to improve patient care and long-term outcomes.

He has been a member of ASPN since 2014 and has been very active within ASPN, serving on several committees, including the Member Education Committee, Research Committee, and Global Health Committee. As an ASPN member, he has enjoyed networking with fellow pediatric nephrologists in North America for clinical and research collaboration, as well as ASPN's educational content (webinars, transplant resources) and leadership opportunities. He plans to remain engaged in ASPN through committee service and hopes to contribute back to the community by providing mentorship and guidance for trainees and young faculty.

Dr. Teoh grew up in George Town, Penang, Malaysia, an area that is known for its multicultural background and as a "food paradise" with rich cuisines inspired by its diverse population. He is a life-long soccer fan, a 'wannabe' photographer, enjoys travelling, and has a 'weak spot' for good food/wine. Some of Dr. Teoh's amazing photos can be viewed here: <https://500px.com/p/chiaweiteoh?view=photos>

Dr. Teoh can be found on Twitter [@ChiaWeiTeoh](#).

ASPN HISTORY PROJECT UPDATE

The ASPN History Project Committee is dedicated to documenting our ASPN's rich history and several new initiatives are available:

1) "Memories of Patients" to recall cases that had a profound impact on the physician professionally and personally, and

2) "My Favorite Mentor", where interviewees would provide a written memoir of a mentor who had a significant effect on their career.

Thanks to Doug Silverstein and Kevin Lemley for leading these initiatives. Anyone who would like to

be interviewed remotely or has interesting stories, photos, pediatric nephrology paraphernalia, etc., should contact Connie Mackay at connie@aspneph.org or members of the Committee so that we may accumulate important historical information to store at the ASPN's archival collection at the University of Virginia at Charlottesville under Robert Chevalier's direction. The entire collection of ASPN documents from its conception in 1967 have been digitalized with Doug Silverstein's assistance and will be categorized at UVA for all to access. Please see the [History Project](#) on the ASPN website under the ASPNF tab.

News and Updates from the American Board of Pediatrics (ABP)

First and foremost, we at the ABP are grateful for your dedication to child health during the pandemic. We hope you and your loved ones are, and remain, safe and healthy.

When you have a moment, we invite you to watch the brief (less than three minutes) video below, which features important news and information you can use as we approach the end of the year. Topics include:

- MOCA-Peds Quarter 3 deadline & extended support hours
- Deadline for external applications for MOC Part 4 (Quality Improvement) credit
- New ways to earn MOC Part 2 (Self-Assessment) credit for completing life support or resuscitation certifications

- Streamlined process to quickly earn Part 4 points for work related to COVID-19 (e.g., telemedicine, new office triage procedures, etc.)
- Earn points for diversity, equity, and inclusion (DEI)-related work

All our best,

The American Board of Pediatrics

MEETINGS AND EVENTS

Dear friends and colleagues,

It is now exactly one year to our ESPN meeting in Vilnius, Lithuania!

The scientific committee for ESPN 2023 is proud to prepare a program of outstanding scientific quality to stimulate cross-talk between different specialties involved in the treatment of children with kidney disorders. Our program is designed with young nephrology fellows, the future of our society, in mind.

While this will be a hybrid meeting, we strongly encourage in-person attendance. This will allow opportunities for collaborations with fellow colleagues, networking with leaders in the field, hands-on workshops and interactive discussions to promote education and research.

So, mark your diaries, book your leave and get ready to participate in ESPN 2023! We look forward to welcoming you in Vilnius!

Prof Augustina Jankauskiene
Congress President

Prof Rukshana Shroff
Scientific Chair

Prof Dieter Haffner
